Partners in Scale. Creating Lasting Impact.

ABOUT US

7 Eleven Holdings is a diversified South African investment and operating group with interests across mineral processing, transport and logistics, hospitality, entertainment, beauty and personal care.

We build, invest in and operate businesses with a focus on sustainable growth, operational excellence and meaningful economic impact.

Our approach is entrepreneurial but disciplined: we identify opportunities, build capable operating businesses, develop strong brands and create platforms that can scale.

Across our portfolio, we look for opportunities where people, capital, operational expertise and strong partnerships can unlock long-term value.

OUR VISION

To build a diversified African group of enduring businesses that create meaningful economic value and lasting impact. We aspire to build businesses that are not only commercially successful, but that contribute to employment, entrepreneurship, skills development and the communities in which they operate.

OUR MISSION

To identify, build and scale high-potential businesses through strong partnerships, disciplined execution and entrepreneurial thinking. We combine capital, people, operational expertise and strategic partnerships to transform opportunities into sustainable businesses.

OUR VALUES

Our values shape how we build, invest and operate across the group. They guide our decisions, relationships and long-term approach to growth.

EXCELLENCE

We pursue high standards in everything we do — from our operations and customer experience to governance and financial performance.

ENTREPRENEURSHIP

We think boldly, act decisively and continuously look for opportunities to create and grow value.

INTEGRITY

We do business honestly, transparently and responsibly, building relationships based on trust.

PEOPLE

We believe great businesses are built by great people. We invest in our teams, partners and communities.

IMPACT

We measure success beyond financial returns. We seek to create employment, develop skills, strengthen communities and build businesses that endure.

PARTNERSHIP

We believe that sustainable scale is built together. We work with investors, customers, suppliers, employees and strategic partners to create shared value.

01 — MINING, MINERAL PROCESSING & BENEFICIATION

Unlocking value from mineral resources through responsible processing.

7 Eleven Holdings is developing a gold ore processing business in Gauteng focused on the recovery of gold from suitable ore and historical mineral dumps.

The business is designed to combine appropriate processing technology, operational discipline and responsible resource management to create a scalable mineral-processing platform.

Our focus includes:

- Gold ore and mineral dump processing
- Gold recovery and beneficiation
- Mineral processing infrastructure
- Responsible resource utilisation
- Strategic partnerships across the mining value chain

Our Gold Processing Venture

The venture will initially focus on processing fine gold-bearing material and historical dumps, reducing the need for conventional mining and primary crushing where the feed material is already suitably sized.

Our longer-term objective is to develop a scalable processing platform capable of working with multiple sources of mineral-bearing material.

WASTE MANAGEMENT & ENVIRONMENTAL REHABILITATION

Turning environmental responsibility into lasting impact.

7 Eleven Holdings intends to establish a waste-management and environmental rehabilitation capability supporting its mineral-processing activities and, where appropriately licensed, broader industry requirements.

The business will focus on the safe handling, treatment, management and disposal of processing-related waste, with environmental protection and regulatory compliance embedded into the operating model.

A key component of this strategy is the rehabilitation of historical and disturbed mining areas, helping restore land and reduce the environmental legacy associated with abandoned or derelict mining operations.

Our approach

PROCESS → MANAGE → REHABILITATE

Where economically and technically viable, mineral-bearing historical material can be processed to recover residual value, while the associated material is managed responsibly and the affected areas can form part of a structured rehabilitation programme.

This creates an opportunity to combine:

- Waste management
- Mineral recovery
- Environmental remediation
- Mine rehabilitation
- Land restoration
- Responsible resource utilisation

Our Environmental Commitment

Our objective is to ensure that the growth of our mineral-processing business is accompanied by responsible waste management and environmental stewardship.

We aim to leave sites safer, cleaner and better managed than we found them, while creating economic value through responsible recovery and rehabilitation.
